

### III.10-IDMA INTERACTIVE DOUBLE MASS ANALYSIS PROGRAM (IDMA)

The Interactive Double Mass Analysis (IDMA) program provides an interactive graphical method for performing consistency checking of station data using double mass analysis and to produce the correction factors that are used in subsequent processing by the Calibration preprocessors.

The IDMA User's Guide contains a detailed description of the IDMA program and is available at the following Internet address:

<http://www.nws.noaa.gov/ohd/hrl>

Select 'view list' under 'Reports/Papers/Publications', 'User Manuals & Online Documentation' and 'Interactive Double Mass Analysis (IDMA) User's Guide'.
